Split string at line break SAP

A string remembers line break as a character # (Hex - 0A) which is different from the normal character # (Hex - 23). I need to split a string at the line break into multiple strings. The normal usage of SPLIT command does not help. If somebody has a better idea, please let me know. Thnaks in advance.

Rounding to 2 decimal places in Python Stack Overflow

Rounding to 2 decimal places in Python. Ask Question . up vote-3 down vote favorite. This isn't a duplicate because I have checked everything before this post on this site. I think I have managed to do the first two bullet points. The first one I will do through a string but I am willing to change that if you know another way. The 2nd one is using comma seperators for the $'s. So I will use a
